Waverly Hall Telephone Company, Inc. (“Waverly Hall”) hereby certifies that it is able to function in emergency situations as set forth in Chapter 515-12-1-.11(4) of the Rules of the Georgia Public Service Commission. Waverly Hall’s network is designed to remain functional in emergency situations without an external power source, is able to reroute traffic around damaged facilities, and is capable of managing traffic spikes resulting from emergency situations as required by Chapter 515-12-1-.11(4) of the Rules of the Georgia Public Service Commission. Waverly Hall can change call routing translations as needed to reroute traffic around damaged facilities. Changing call routing translations will also allow Waverly Hall to manage traffic spikes throughout its network, as emergency situations require.

Specifically, each central office building is supplied with standby generators and battery back-up that enable the central office to keep running until power is restored so long as fuel is available, or until system changes are made to reroute traffic. Waverly Hall has battery backup at all office locations and in its electronic equipment sites. Length of run time is determined by the equipment serving the area and the number of customers working out of the equipment.
